- Confluence
- SonarQube

WORK EXPERIENCE

Yondu, Inc.

2024

Software Engineer – Android

- Developed and implemented enhancements for a client's Android app using Kotlin, optimizing performance and resolving critical bugs, resulting in improved stability and user experience across devices.
- Provided technical support by troubleshooting complex issues, resolving critical problems, and improving app stability, resulting in enhanced performance and user satisfaction.
- Collaborated with cross-functional teams to develop and deliver new features and enhancements.

Cafe24 Philippines

2021 – 2023

Senior App Developer

- Created software architecture plans and project timelines, collaborating with headquarters to ensure project alignment and successful execution.
- Collaborated with cross-functional teams to develop and deliver new features and enhancements.
- Developed new features, implemented enhancements, and resolved issues for personalized e-commerce Android apps, leveraging the company's e-commerce platform to deliver tailored solutions for clients.

- Migrated a legacy Java codebase to Kotlin, improving maintainability, speeding up feature development, and reducing bug reports by 50%.
- Designed and implemented a scalable server-driven UI framework using Jetpack Compose, enabling instant UI changes to Android apps without requiring app store updates.
- Analyzed software specifications and requirements to design efficient solutions.
- Developed detailed technical plans and conducted thorough analysis to ensure optimal solutions.
- Reviewed code from team members to ensure high-quality, maintainable code and adherence to best practices.

App Developer

2020 – 2021

- Developed a Flutter-based identity management app, enabling employees to securely access internal sites and tools via PIN, biometrics, and two-factor authentication.
- Developed a Flutter mobile app with a system that connects clients and Korean brand owners to collaborate on promotions and events based on shared business goals, targeting consumers.

Web Developer

2018 – 2020

- Developed a web app to synchronize products between the company's Korean and Japan e-commerce platforms, ensuring consistent product availability across regions.
- Developed a web app that enables clients to specify shipping locations for individual products, optimizing logistics and inventory management.

Aptus Global Solutions

2017

Web Developer Intern

- Developed an internal employee portal web app, enabling efficient clock-in/clock-out, time tracking, and access to various work tools.

EDUCATION

Polytechnic University of the Philippines

2014 – 2018

Bachelor of Science in Computer Science
